

REMARKS

Reconsideration and allowance of this application are respectfully requested in view of the above amendment and the discussion below.

Applicants invention has been extensively discussed in previously filed responses including the Amendment filed January 5, 2004 and the Response filed May 21, 2004.

The following discussion will be addressed to the indication given in the Advisory Action of July 14, 2004 wherein it was noted that the arguments concerning a showing of a separate compatibility documentation server and a configuration document server in the primary reference to Snow were not persuasive because the limitation was not reflected in the claim language. Accordingly, as stated in the final rejection of January 29, 2004, the rejection of claims 2-6 under 35 U.S.C. 103 as anticipated by Snow U.S. Patent No. 6,434,455 was maintained.

Applicants have filed, in conjunction with this Amendment, a Request for Continuing Examination and accordingly the above amendment to independent claim 6 with respect to a specific statement concerning the separate compatibility documentation server is now seen to overcome the rejection based on the reference to Snow.

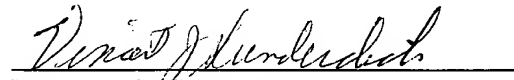

Accordingly, Applicants respectfully request an allowance of this application containing claims 2-6.

If necessary to effect a timely response, this paper should be considered as a petition for an Extension of Time sufficient to effect a timely response, and

please charge any deficiency in fees or credit any overpayments to Deposit

Account No. 05-1323 (Docket #095309.50650US).

Respectfully submitted,

Vincent J. Sunderdick
